MEMORANDUM

Date: April 16, 2007

Subject: ASTM A1011 vs A570

From: Unistrut Engineering

In 2000, ASTM discontinued specification A570 along with four other specifications and combined them all into a single new specification A1011. The discontinued A570 Grade 33 designation became A1011 SS Grade 33.

The chemical and mechanical properties of A1011 SS Grade 33 are the same as A570 Grade 33. As a result, Unistrut changed their material specifications to ASTM A1011 SS Grade 33. Note, that ASTM uses SS to designate structural steel quality.

ASTM A1011 SS Grade 33 has the same form, fit and function as A570 Grade 33.
